

The Dubarry Footwear Protection Range

Cleaner

- Aids in the removal of dirt and other residues
- Prepares leather for proofing and conditioning

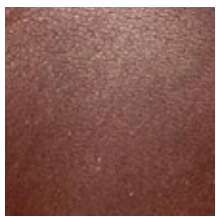

Suitable for all types of footwear

Conditioner

- Conditions the leather restoring its original appearance and also offering water repellency

Suitable for all smooth leather

Protector

- Restores a water repellent finish, offering high stain resistance

Suitable for all nubuck and suede leather

Use Cleaner on all leather parts of the boot, then **apply Conditioner**

Tweed panels
Use a soft damp cloth to remove any mud and stains from this Teflon® treated surface

EXTRA PROTECTION

Repeated wetting and drying can eventually cause leather to crack. Like human skin these natural leathers require regular moisturising. **Dubarry Leather Cream** contains tea tree oil, eucalyptus oil, emu oil, beeswax and lanolin to help protect, preserve and soften the leather while enhancing the water repellent properties.

In addition to the other three products described here, Dubarry strongly recommends the use of our Leather Cream, especially in the flex part of the foot. **Dubarry Leather Cream is to be used on the smooth leather ONLY.**

IMPORTANT: yard manure, waste liquids and salt water can be very corrosive to leather. To prolong performance and protection for your Dubarrys, always scrub them with a brush and rinse with fresh tap water after exposure.
